

Knock Knock !

The pdfs are landscape A4 pages

Read online

This is easier with a larger screen. Simply open the file and navigate around and zoom in on what you want to read. You might find a smaller screen easier in landscape.

Print

Use A4 paper if possible and set as landscape. If you scale to 100% then the page will be identical in size to the original book.

There is colour on these pages but it should print satisfactorily on a black and white printer.

Enjoy
